

YOGESH CHAUDHARY

Python / Django Developer

Kathmandu, Nepal — +977-9816288287

✉ yogeshchy635@gmail.com —  GitHub —  LinkedIn —  Portfolio

Objective

Full Stack Developer specializing in backend systems, API architecture, and scalable web applications using Python and Django. Experienced in building AI-powered platforms, secure authentication systems, and real-time applications.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS

Backend: Django, DRF, FastAPI

Frontend: Next.js, React, Framer Motion

Databases: PostgreSQL, MongoDB, LanceDB

AI: RAG, LLaMA-3 (Groq), Gemini Embeddings

Auth: JWT, RBAC, OAuth 2.0

Tools: Git, Postman, VS Code

Projects

NexusAI – AI Productivity Platform

 Live Demo

FastAPI, Next.js, PostgreSQL, LanceDB

- Developed a RAG-powered AI platform using Groq (LLaMA-3) for semantic discussion with PDFs.
- Created an AI humanizer to transform writing produced by AI into information that is natural and human-like.
- Scalable vector search was implemented for quick, context-aware retrieval using Gemini Embeddings and LanceDB.
- Built secure JWT authentication with document history and multi-user chat that is persistent
- Asynchronous streaming APIs were used to optimize backend performance for sub-second answers.

CleanRide- Online CarWash Booking platform

 Live Demo

Django REST Framework, Next.js, PostgreSQL, Khalti

- Built a real-time car progress tracking system (Queued → Washing → Drying → Completed).
- Developed a queue management algorithm to calculate wait times using personnel capacity and service length.
- Khalti payment gateway integration with safe verification and error management
- Used JWT and DRF to provide a scalable RBAC system for various user roles.
- TanStack Query, Framer Motion, and Next.js were used to improve frontend speed for seamless, real-time changes.

Education

Bachelor of Science (BSc)

Expected 2027

Tri-Chandra Multiple Campus

Training & Certifications

Python with Django
